## GAUGES

The gauges offered are suitable to operate at the pressure of 700 bar. They allow for full control of pressure in the system and ensure safe operation.

Depending on the selected pump model, pumps are available with a rear or bottom connection. If a complete pump is purchased, a gauge is included as standard.

## HYDRAULIC HOSES

Hydraulic hoses offered by our company are resistant to squeezing and wear which guarantees safe operation with the pressure of 700 bar. The hydraulic hose ends and lengths are tailor-made and selected individually.

If a complete pump is purchased, hydraulic hoses are offered as an option.

## QUICK COUPLINGS

If a complete pump is purchased, hydraulic hoses are offered as an option.

Our offer includes screw and clamp type quick coupling. Their proven structure ensures tightness of the system and safe operation. We offer 3/8" NPT or BSPT quick couplings. If a complete pump is purchased, quick couplings are included as standard.

## REMOTE CONTROLS

We offer manual or foot remote controls. Depending on the mode of operation of a powered tool, remote controls have one or two buttons. If a complete pump is purchased, a manual remote control with a 2-m long cable is included as standard.
